NOAAWatch is a website offering information about ongoing environmental events. NOAAWatch explains the role of NOAA in prediction, monitoring, and recovery from environmental hazards. It provides public access to current information on a number of environmental threats ranging from oil spills, to hurricanes and tsunamis, to space weather.

The National Hurricane Center normally issues public advisories on their website and to the media for Atlantic tropical cyclones every six hours at 4:00AM CDT, 10:00 AM CDT, 4:00 PM CDT, and 10:00 PM CDT. Intermediate public advisories may be issued every 3 hours when coastal watches or warnings are in effect, and every 2 hours when coastal watches or warnings are in effect and land-based radars have identified a reliable storm center. Additionally, special public advisories may be issued at any time due to significant changes in warnings or in the cyclone.

WMXC 99.9 FM (Mobile)  
 WOOF 99.7 FM (Dothan)  
 WKMX 106.7 FM (Enterprise)  
 WNTM 710 AM (Mobile)

### Mississippi:

MS Public Broadcasting 88.1- 91.3 FM  
 WZKX 107.9 FM (Gulfport)  
 WBUV 104.9 FM (Biloxi)  
 WRJW 1320 AM (Picayune)

WKNN 99.1 FM (Pascagoula)  
 WXRR 104.5 (Hattiesburg)  
 WJZD 94.5 FM (Gulfport)  
 WQRZ 103.5 FM (Bay St. Louis)

## NOAA Weather Radio

*Not manufactured by NOAA, NWR receivers can be purchased at many retail outlets and on the Internet*

NOAA Weather Radio (NWR) All Hazards is a nationwide network of radio stations broadcasting continuous weather information directly from a nearby National Weather Service office. NWR broadcasts National Weather Service warnings, watches, forecasts, and other hazard information 24 hours a day.

162.400 MHz    162.425 MHz    162.450 MHz    162.475 MHz    162.500 MHz    162.525 MHz    162.550 MHz

## REVERSE-LANING FOR HURRICANE EVACUATION

### Reverse-Laning Plan Map

### Plan for Reverse-Laning For Hurricane Evacuation

Certain strategic routes have been historically identified as hurricane evacuation routes. These hurricane routes are “signed on the ground” as such and have been presented to the public in various manners for their knowledge and use. This hurricane evacuation route network begins with state and county routes in coastal areas that then feed into US and Interstate routes. These existing hurricane evacuation routes serve as the base for the “Reverse-Laning” plan.
